

## **General Orientation - NOTICE OF SELECTION PROCESS - item 15, paragraph 2**

New graduate students applying to enter the pos-graduate program are exempt from taking the entrance exam if they have received a research fellowship or participate in grants financed by public or private institutions intermediated by FUNCAMP (or similar foundations). Their applications for admittance must be accompanied by a note from their thesis supervisor explaining how the fellowship selection process was carried out.

The pos-graduate commission does not carry out a formal, rigid and complex procedure but requests that there must have been ample disclosure of the fellowships, that the selection process was carried out with criterion that had been specified in the disclosure (for example curriculum evaluation) and that it be informed how many students applied for these fellowships with justification of candidate selection. The commission suggests that the criteria consists of at least an evaluation of the curriculum vita and/or undergraduate transcript.

Please avoid selections based only on interviews.
